Let's Start!

Technology is connecting people all over the world. Welcome to the future!

Learning Outcome

Accurately use information about common technology in communicative situations.

Ask your partner:

- Where do you think you will be in the next five years? What will you do?
- Do you have electronic devices at home? What are they?

Can Do Statements

- I can talk about technology.
- I can talk about future action.
- I can express complex statements using words like who, that or which.

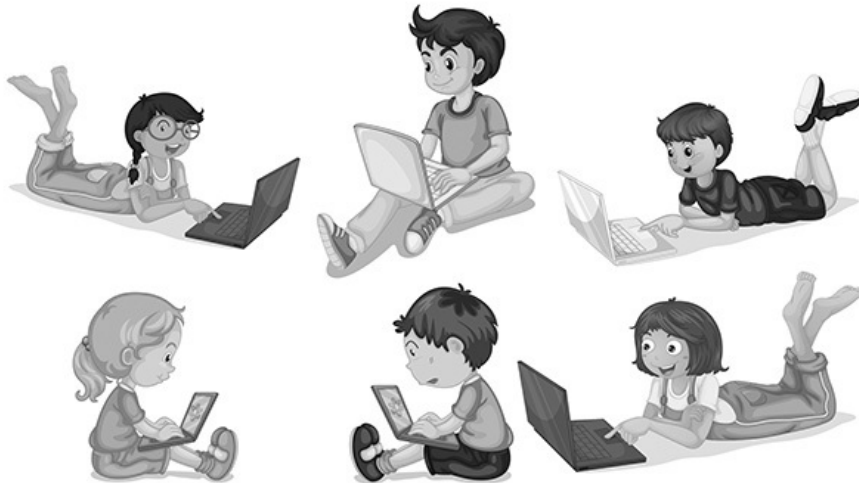

Let's Explore!

Mr. Anderson believes that everyone will have computer **literacy*** skills in the future.

* "Literacy" means the ability to read and write. You use it to talk about knowledge in a specific area.

Instructions: Read the text aloud.

- Sally:** Before we wrap up our interview, I'd like to ask you one last question. How would you share your views on the future of technology with people who have no access to computers?
- Mr. Anderson:** I'm glad you asked. There is a conference next week on this subject. I'm preparing a talk for it. I'm going to show the advances that tech companies are making in this field. For example, Google and Microsoft are giving away computers that kids in poor countries can use at school.
- Sally:** This is an initiative that more people should know about!
- Mr. Anderson:** I agree. We're closing the gap between people who have no computer literacy skills and those who own several devices. We expect that the overwhelming majority of the world population will have access to technology by 2020, which is only a few years away!
- Sally:** That sounds exciting.
- Mr. Anderson:** It sure is. Do you remember life before the Internet?
- Sally:** Hmm ... Actually, I don't. I remember my first computer, though! It was so slow ... and so huge! I think my phone has more RAM than the laptop I used in college!
- Mr. Anderson:** Well, imagine what someone from the future will say about the technology that we're using today!

Let's Practice!

Mr. Anderson shares his final thoughts on technology.

Instructions: Choose one of the words below in order to complete the sentences. Use: advances, more RAM than, closing the technological gap, overwhelming, initiative.

1. Tech companies have made huge technological _____ in recent years.
2. This is an _____ that more people should know about.
3. We're _____ between poor people and rich people.
4. The _____ majority of the world population has access to modern computers now.
5. I think my phone has _____ the laptop that I used in college!

Let's Practice!

Sally and Mr. Anderson are looking forward to the year 2020!

Instructions: Proofread the sentence. Underline the incorrect word.

1. There is a conference last week on this subject.
2. I'm prepared a talk for it.
3. I'll going to show the advances that tech companies are making in this field.
4. The majority of the world's population will have access to technology buy 2020.
5. Imagine what someone from the future will said about the technology that we're using today!

Extension Activity

Make a list of how technology will improve people's lives in the future.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online. Find information about new technologies and initiatives to improve people's lives.
- Write a list of 4 technologies you found interesting or original.
- Briefly explain why you think each technology is important, and why you think they will help improve people's lives.
- Use the chart below to take notes.
- Compare your list with your partner and ask questions about their activities.

Self-Assessment

Yes **No**

I write about new technologies.

☐ ☐

I talk about future actions.

☐ ☐

I ask for clarification about complex ideas with a partner.

☐ ☐

Technology	How will it improve people's lives?

Target Words

- conference** (noun): a formal meeting for discussion
e.g. There is a conference next week on the subject of access to technology.
- advance** (noun): technological progress
e.g. I'm going to talk about advances in new technologies.
- field** (noun): subject of study
e.g. I'm going to show the advances that tech companies are making in this field.
- initiative** (noun): an idea meant to improve a situation
e.g. This is an initiative that more people should know about!
- to close the gap** (expression): to reduce a disparity between people
e.g. We're closing the gap between the people who have no computer literacy skills and those who own several devices.
- overwhelming** (adjective): very great; very strong
e.g. The overwhelming majority of the world population will have access to technology by 2020.
- RAM** (noun): Random Access Memory; the processing power of a computer
e.g. I think my phone has more RAM than the laptop that I used in college!

Learning Points

Talking About the Future

You can use four different tenses to talk about the future.

- When you talk about things that are not decided or when you make a decision at the moment of speaking for the future, you use the modal *will*.
- When you ask about intentions, you use *going to*.
- When you talk about things that are arranged, on the agenda or booked for the future, you use the Present Continuous tense.
- When you talk about schedules or timetables in the future, you use the Simple Present tense.

Verb Tense	Example
Future Tense (Will)	<i>The majority of the world population will have access to technology by 2020.</i>
Going to	<i>I'm going to show the technological advances in future computers.</i>
Present Continuous Tense	<i>I'm preparing a talk for a conference tomorrow.</i>
Simple Present Tense	<i>There is a conference next week on this subject.</i>

Learning Points

Subject and Object Relative Clauses

When you want to make it clear which person or thing you are talking about, you use a relative clause.

You can begin a relative clause with *who* for people, *which* for things or *that* for either people or things.

In spoken English you usually use *that*, rather than *which* or *who*.

You put the relative clause immediately after the noun it talks about.

A subject relative clause describes the subject of the clause.

Example:

The man who called wanted to speak to Tom. Which man? The man who called.
The clause *who called* immediately follows man - the noun it describes.

An object relative clause describes the object of the clause.

Example:

Can you return the book that I lent you? Which book? The book I lent you.
The clause *that I lent you* immediately follows book - the noun it describes.

Example	Clause	Relative connector	Type of Relative Clause
<i>The world population will have access to technology by 2020, which is only a few years away!</i>	which is only a few years away	which	subject
<i>We're closing the gap between the people who have no computer literacy skills and those who own several devices.</i>	who have no computer literacy skills; who own several devices	who	subject
<i>Google and Microsoft are giving away computers that kids in poor countries can use at school.</i>	that kids in poor countries can use	that	object
<i>I'm going to show the advances that tech companies are making in this field.</i>	that tech companies are making in this field	that	object
