Let's Start!

The Internet is full of possibilities. It's a brave new world!

Learning Outcome

Accurately use information about common technology in communicative situations.

Ask your partner:

- How often do you use the Internet? What do you usually do online?
- Have you ever tried virtual reality programs or simulations?

Can Do Statements

- I can talk about technology.
- I can ask for clarification or use rhetorical questions to emphasize a point.
- I can talk about future action.

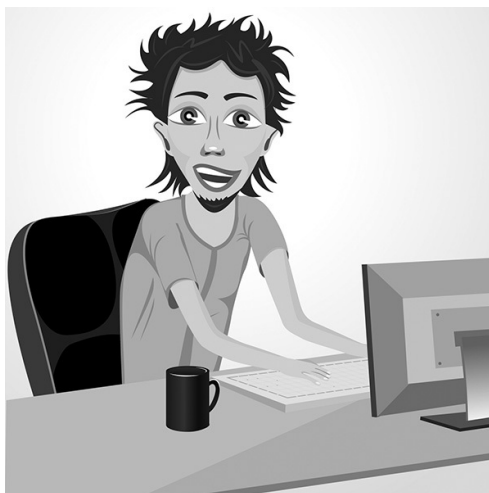

Let's Explore!

Mr. Anderson is a technology enthusiast. Listen to him talk about the **brave new world*** of virtual reality.

* "Brave New World" is a science fiction novel by Aldous Huxley about the effects of new technologies on people.

Instructions: Read the text aloud.

- Sally:** Mr. Anderson, you are a specialist in the field of new technologies. Can you share with us which future developments you look forward to the most?
- Mr. Anderson:** Without a doubt, I would say that virtual reality is going to change everything. With virtual reality, you'll put on a headset and find yourself in an alternate world. People are going to have experiences that they can't have in the real world, such as time or space travel. It will feel so real that they won't realize it's fake.
- Sally:** Could you explain how users will get involved in the process?
- Mr. Anderson:** Computer experts predict that virtual reality will take over television and video as the main source of home entertainment. In addition, they see important educational possibilities. In a biology lesson, for example, learners will be able to travel inside the body or inside plants. I'm developing a program like this next week.
- Sally:** That sounds complicated, and expensive. Do you think that people will be able to afford the technology?
- Mr. Anderson:** In the near future, everyone will be able to afford virtual reality. Experts predict that computer companies will give free equipment to people who subscribe to virtual reality services. Pilot programs are set to begin next year.

**Let's Practice!**

The future looks bright!

Instructions: Unscramble the words to find out the mystery sentence.

1. put / yourself / With / alternate / . / headset / in / world / virtual / reality / you / ll /
and / find / ' / on / a / an

2. feel / so / ' / real / will / Virtual / realize / it / reality / they / that / won't / . / s / fake

3. over / that / source / the / take / experts / . / virtual / home / of / reality / Computer /
predict / as / main / will / entertainment

4. future / In / afford / able / reality / everyone / be / . / near / virtual / will / the / to

5. programs / to / next / set / . / are / year / Pilot / begin

**Let's Practice!**

Sally is very curious about virtual reality.

Instructions: Match the items in Column A with those in Column B to complete the questions.

COLUMN A**COLUMN B**

- | | |
|---|--|
| 1. Can you share with us | a. will get involved in the process? |
| 2. Can you explain how users | b. which future developments you look forward to the most? |
| 3. Do you think people will be able to | c. offers for educational possibilities? |
| 4. Can you tell us what virtual reality | d. afford the technology? |

Extension Activity

Make a list of new technologies people are excited about.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Ask 4 people you know about their opinion on new technologies.
- Ask them if they like to use new technologies.
- Ask what new technologies they may use in the future and how their lives may change.
- Write the results in the chart below.
- Share your answers with your partner.

Self-Assessment

Yes **No**

I talk about future actions.

☐ ☐

I ask for clarification about plans in the future.

☐ ☐

I talk about technology.

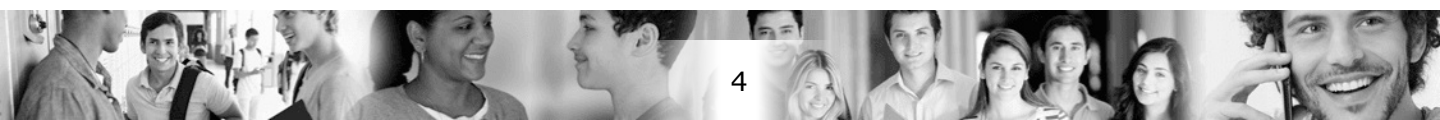

☐ ☐

Name	Opinion	Future Use?

Target Words

- virtual reality** (noun): a computer-generated simulation of real life that a user can interact with
e.g. With virtual reality, you're going to have experiences you can't have in the real world.
- fake** (adjective): not real; imaginary
e.g. Virtual reality will feel so real that people won't realize it's fake.
- headset** (noun): set of headphones and special goggles with a microphone attached to use with computer programs
e.g. You'll put on a headset and find yourself in another world.
- expert** (noun): a person who is very knowledgeable about a subject
e.g. Computer experts predict that virtual reality will take over television.
- educational** (adjective): intended to educate and enlighten
e.g. There are important educational possibilities with virtual reality.
- equipment** (noun): necessary items for a particular purpose; technology
e.g. Computer companies will give free equipment to people who subscribe to virtual reality services.
- alternate** (noun): different; taking the place of something else
e.g. With virtual reality, you will find yourself in an alternate world.
- pilot program** (noun): used as an experiment or test
e.g. Pilot programs are set to begin next year.

Learning Points

Questions Within Sentences

You ask for clarification when you want more details of what the other person is talking about.

We often ask for clarification when we are not clear on what the other person is referring to. We ask the other person to be more specific by giving more information.

You can use questions with sentences to ask for clarification. You ask a question including a sentence within the question, like *Don't you think it sounds a bit too intense?*

Questions with sentences are called **embedded questions**.

You can use **embedded questions**, like *Can you tell me ... ?* or *Do you know if/which/what ... ?* to ask for clarification.

Look at the chart below for an explanation on how to make embedded questions.

Main Question	Embedded Question
Do you know ...	what/where/when/who ... ?
Do you remember ...	what/where/when/who ... ?
Can you tell me ...	what/where/when/who ... ?
Could you tell me ...	what/where/when/who ... ?

Examples:

- *Could you explain how users will get involved in the process? (question with sentence)*
- *Do you think that people will be able to afford the technology? (asking for clarification)*

Learning Points

Talking About the Future

You can use four different tenses to talk about the future.

- When you talk about things that are not decided or when you make a decision at the moment of speaking for the future, you use the modal verb *will*.
- When you ask about intentions, you use *going to*.
- When you talk about things that are arranged, on the agenda or booked for the future, you use the Present Continuous tense.
- When you talk about schedules or timetables in the future, you use the Simple Present tense.

Verb Tense	Example
Will	<i>In the near future, everyone will be able to afford virtual reality.</i>
Going to	<i>People are going to have experiences that they can't have in the real world.</i>
Present Continuous	<i>I'm developing a program like this next week.</i>
Simple Present tense	<i>Pilot programs are set to begin next year.</i>
